BER12 - state-of-the-art server room near Berlin

To ensure the best possible outcome of our work, we have been using LEAN tools on the BER12 construction site since the very beginning. These include, first and foremost, on-site activity planning - both on a daily basis (Daily Activities Briefing) as well as weekly forward planning, the so-called 6-week look ahead. In this way, we can optimise processes accordingly, reduce unnecessary expenditure, and ensure the highest level of safety and the quality of our work.

Impressions

Image notes

1

BER12 Data Center

The state-of-the-art server room will encompass nearly 12,000 sqm

2

Aerial view of the data

Extended technological space on the roof

3

LEAN in practice

With ongoing planning of on-site activities, the project can be completed on time
