Conversion works to accommodate European connections

Thereafter, followed contracts for the 7th construction stage, the 3rd construction stage and the 4th construction stage. Since then, tangent routes have been diverted, exit lanes have been newly constructed in accordance with the specification requirements of the Highways Department of the German Federal State of North-Rhine Westphalia and completely new lanes laid down and added.

The 1st and 3rd construction stages comprised the conversion of the motorway junction hub on the A 44 motorway proceeding from the Belgian region. The 7th construction stage comprised the conversion of the A 4 motorway from the junction hub in the direction of the regions of the Netherlands. During the 4th construction stage, the conversion of the A 4 motorway lanes from the direction of Cologne in the direction of the Netherlands was completed, as well as the construction of the entrance and exit lanes to the superimposed A 44 motorway, in the direction of the Belgian regions as well as in the direction of Dusseldorf, Germany.

Impressions

Image notes

1

Rehabilitation of Aachen motorway junction.

The Aachen motorway junction was expanded in several construction phases to become an efficient traffic junction.
