Relief for the Frankfurt (Oder) city center

In the existing side areas, longitudinal parking spaces and a 1.50 m wide footpath were constructed on both sides.

In accordance with the circumstances of an inner-city construction project, the main focus of the task was to minimise the construction time. The selected fully-bound superstructure could be used sensibly and on schedule, taking into account the special features of the consolidation.

Impressions

Image notes

1

Extension of Weinbergweg, Frankfurt/Oder

Paving the asphalt binder course of the fully-bound pavement.
