Demanding road rehabilitation between Schönesseiffen and Hellenthal Realised on schedule

In total, impressive amounts of materials were used to restore the rural road. The asphalt base course comprised 8,500 t, the area amounted to 32,000 m². In addition, 16,000 t of frost protection material was used and 16,500 t of soil was removed.

Weather conditions in the Eifel made work difficult

The weather conditions in the high location in the Eifel presented a special challenge. Snowfall during the night ensured that the road was covered in white within a few minutes. was covered with snow. Two construction sections were even asphalted in driving snow, whereby the second section took place at the end of April. The low point of the temperatures was an icy -14 ° Celsius.

Customer requirements "fastest possible rehabilitation" fulfilled

Despite the adverse weather conditions and the tight schedule, handover took place as planned to the client. The team from Düren proved maximum efficiency, especially during the hard winter working season. Performance and shoulder to shoulder.
