# Affordable sustainable living in the colossal Lichtenberger Riese

with 164 fully accessible throughout. Once the final touches are complete, tenants will have access to soundproofed outdoor relaxation spaces with an exercise trail, giant swings, recreational football field and even a small sandpit. The roof terrace features seating, raised garden beds, a climbing wall and areas for sporting activities.

## Environmentally friendly development

Decentralised home stations provide a direct hot water supply to each apartment, along with central ventilation and heat recovery for an ideal energy balance. The decentralised drinking water stations alone save up to 30 per cent energy in the hot water supply, as they work at a lower system temperature.

Along with drinking water stations, each apartment features ventilation and heat recovery via a heat exchanger. This system works by expelling the air used and simultaneously drawing in fresh air from outside, enabling up to 82 per cent heat recovery.

## Impressions

## Image notes

1

Wohnhochhaus LIESE, Berlin

PORR Building Construction Region East realised the new LIESE residential tower block in Berlin as general contractor.

2

LIESE residential tower, Berlin

The residential tower block is located in the family-friendly and green district of Lichtenberg - just a stone's throw from the vibrant life of Berlin-Mitte.
