Building in the tightest of spaces.

A special feature are two high-quality penthouse flats with generous terraces and the best views over the market and the city of Bielefeld. During the construction phase, another building was erected in the immediate vicinity. Its completion overlapped with the shell construction work on the Bielefeld quarter and so exact coordination was required. Due to the confined space, necessary work measures had to be planned and coordinated in detail. For the delivery to the construction site and the positioning of the crane, the adjacent Kavalleriestrasse was closed off on one side.

Our specialists on site ensured constant and well-functioning coordination of delivery traffic so that inner-city traffic was not impaired.
