# Precision coordination.

Since the air traffic may never be interrupted, repair work along the runways and aprons (where the planes park) must be coordinated down to the last detail. Our workers on the airfield maintain constant radio contact with the tower. Some of our work is coordinated with air traffic control right to the minute. It is a task requiring a lot of trust and precise timing – a job for BBGS.

## Impressions

## Image notes

1

Precision at every level.

Work is scheduled down to the second to ensure that air traffic is not disrupted.

2

Communication at every stage.

Planning involved constant coordination and perfect organisation.
