A special focus on sustainability

The demolition of the old 1980s buildings began in 2018. Two eight-storey office buildings, a former canteen and a bunker from the Cold War era were demolished. The 4,300 tonnes of concrete parts obtained and processed were reused for filling the construction pits and for road construction. From energy-efficient and mobility-friendly planning to environmentally friendly demolition and resource-saving construction, the concept of sustainability determines the project.

The apartments and commercial space are managed by BUWOG Immobilien Treuhand GmbH and offer future residents modern and urban living in one of the most sought-after locations in Dresden. 'We are delighted that the completion of the 'Schützengarten' project will not only provide the city of Dresden with urgently needed living space, but will also offer future residents a high level of living quality,' says Lutz Rosenberg, PORR building construction site manager in Dresden.
