Expansion works beside the company headquarters

and blends seamlessly with the existing architecture.

A food, fashion and business adventure

An inviting flight of steps leads visitors up into the new building, which features an extraordinary atmosphere of space and openness with ceiling heights stretching up to 7m. The longer sides were constructed as a transom-mullion façade, while the concrete walls on the gable sides are clad with high-quality aluminium panels. The interior offers a successful combination of cuisine and fashion, conveying the ambiance of the Italian markets from the ground floor right up to the gallery level. Fashion house Cinque has been invited to join Van Laack in the building. La Cottoneria, a restaurant run by former star chef Philipp Eberhardt, is a project close to the client's heart. The restaurant can seat up to 300 patrons and features a delightful outdoor terrace, making it the perfect gathering place for football fans or the ideal event venue or corporate dining destination. The second floor contains modern office spaces featuring a pleasant, non-allergenic climate generated by a concrete ceiling thermal temperature control system.

Impressions

Image notes

1

Van Laak Food & Fashion Center, Mönchengladbach.

PORR was responsible for the turnkey construction of the airy, light-flooded building.

2

Van Laak Food & Fashion Center, Mönchengladbach.

The concrete walls on the gable ends are clad with high-quality aluminium panels.
