

About PORR GmbH & Co. KGaA

Company profile

PORR GmbH & Co. KGaA is part of the listed company PORR AG in Germany and employs more than 3,000 staff. Drawing on combined expertise from various sectors of the construction industry, the company delivers complex building construction, infrastructure and specialist projects. Its services range from planning and project preparation through site management and execution to completion.

At the heart of its approach is the “Green and Lean” philosophy, which takes environmental, economic and process-related aspects into account in both planning and execution. Digital methods such as BIM and Lean Management support structured workflows, transparent processes and efficient project management.

In Germany, PORR operates in sectors including railway construction, data centres, design & engineering, government services, healthcare, building construction, industrial construction, structural engineering, mineral resources, special civil engineering, tunnelling, environmental engineering and transport route engineering.
